The human brain is the central organ of the human nervous system, and with the spinal cord makes up the central nervous system. The brain consists of the cerebrum, the brainstem and the cerebellum.

Human brain - Wikipedia

At the end of the Devonian period (360 million years ago), the seas, rivers and lakes were teeming with life while the land was the realm of early plants and devoid of vertebrates, though some, such as Ichthyostega, may have sometimes hauled themselves out of the water.

Amphibian - Wikipedia

Microglia, the brain's primary immune sentinels, quickly regenerate and restore their population after an acute insult. Lihong Zhan, Li Gan and colleagues use lineage tracing to address the debate about the origin of repopulating microglia and describes the spatial and temporal characteristics of microglial regeneration.

Prior chapters in this volume answer the what and why questions of teaching about evolution and the nature of science. As every educator knows, such discussions only set a stage.

Activities for Teaching About Evolution and the Nature of ...

Meningitis is an infection of the meninges, the membrane covering the brain. Bacterial meningitis is very serious because its onset is rapid and the infection is associated with a significant risk of death; it may also result in mental retardation, deafness, epilepsy, etc. It can be treated with appropriate antibiotics that also prevents spread.
